Index to Volume 9, Numbers 1–4, pages 1–302 ISSN 0010 4485

A

Aircraft design 23, 243
Air-traffic control systems design 151
Algorithmic structures 58
Analytical functions for designing curved surfaces 3
Audio recording heads, design of 109
Application, interactive design system 225

Authors

Albano, A A method to improve two-dimensional layout 48
Al-Thiga, R S and Gough, N E Interactive language for computer-aided identification and control system design 114
Armitage, B S and Hall, P A V Conceptual schema for CAD 194
Aylward, G and Turnbull, M Visual analysis: a computer-aided approach to identifying visibility 103
Baker, K D Software design for CAD 275
Ball, A A CONSURF. Part 3: how the program is used 9
Barlow, J F Graphical display of critical path networks 13
Bolmstedt, U Simulation of the steady-state and dynamic behaviour of multiple effect evaporation plants 29
Cavagna, C and Cugini, U A data structure for the description and handling of engineering drawings 17
Coles, W A Use of graphics in an aircraft design office 23
Cooley, M J E Impact of CAD on the designer and the design function 238
Coons, S A Modification of the shape of piecewise curves 178
English, C H Interactive computer-aided technology 243
de Groot, D J Designing curved surfaces with analytical functions 3
Grover, D Hardware for visual information 223
Haber, R B *et al.* Computer-aided design of framed dome structures with interactive graphics 157
Hatvany, J *et al.* World survey of CAD 79
Hoeksma, J W High-resolution interactive colour display 173
Humcke, D J and Kent, D P Ergonomics of a large interactive graphics operation 262
Kaposi, A A An engineer's guide to algorithmic structures 58
Laxon, W R Selecting and evaluating CAD systems 233
Mapps, D J and McQuade, E Design of replay audio recording heads 109
Newton, J F *et al.* Case study: design of low-noise gas valves 135
Pal, T K and Nutbourne, A W Synthesis of a single span of a 2D curve using linear curvature elements 121
Patel, K Computer-aided decomposition of geometric contours into standardized areas 199
Rodrigues, J S N and Simons, N E Finite element program for solution of geotechnical problems 181
Rogers, R *et al.* Computer graphics input methods for building energy analysis 165
Roth, J W Interactive design system application 255
Scharnhorst, R K and Smith, C R Synthesis of two-dimensional bodies in potential flow 41
Sherlock, J F Design and simulation of man–machine systems using network models 151
Tong, L C and Gourley, S F Logic simulation using interactive hardware 99
Trowbridge, C W CAD at the Rutherford Laboratory, UK 53
Szygenda, S A Research in progress: fault tolerant design and digital simulation for increased system reliability and design automation 205
Vickers, G W Computer-aided manufacture of marine propellers 267

Automation, fault tolerant design and digital simulation for increased system reliability 205

CAD Centre Scene

Designing diesel engine manifolds 75
GINO-2D graphics package 211
Prime mover design scheme 147
Raster-scan colour graphics display 291

CAM 23, 243, 267
Case studies: Design of low-noise gas valves 135
Colour display, interactive, high-resolution 173
Command languages 115
Conceptual schema for CAD 194

Conferences

ASAS international users' conference '76 142
CAD/CAM IV: productivity with computer help 141
13th Design automation conference 71
Interactive design systems 290

CONSURF. Part 3: how the program is used 9
Control system design, interactive language 114
Critical path networks, graphical display of 13
Curves, modification of the shape of piecewise 178
Curve synthesis 121
Curved surface design 3

D
Data-structure for the description and handling of engineering drawings 17
Decomposition of geometric contours into standardized areas 199
Design and simulation of man–machine systems using network models 151
Designer and design function, impact of CAD 238
Designing curved surfaces with analytical functions 3
Design system application, interactive 255
Display, high-resolution interactive colour 173
Display, raster-scan colour graphics 291
Displays, hardware for visual information 223
Dome design 157
Drafting system 255

E
Electron-beam machine 199
Energy analysis, building 165
Engineering drawings, data structure 17
Ergonomics of a large interactive graphics operation 262
Evaluating and selecting CAD systems 233
Evaporation plant simulation 29

F
Fault tolerant design and digital simulation for increased system reliability and design automation 205
Finite element program for solution of geotechnical problems 181
Framed dome structures 157

G
Geometric contour decomposition 199
Geotechnical problems, finite element program for solution 181
Graphical display of critical path networks 13
Graphics in an aircraft design office 23
Graphics input methods for building energy analysis 165
Graphics operation ergonomics 262

H
Hardware for visual information 223
High-resolution interactive colour display 173

I
Integrated circuit design 173, 199
Interactive colour display, high-resolution 173
Interactive computer-aided technology 243
Interactive design system application 225
Interactive graphics operation ergonomics 262
Interactive language for identification and control system design 114

L
Language for computer-aided identification and control system design 114
Layout, two-dimensional 48
Light-pen 2, 78, 150, 301
Lofting 9, 23, 243
Logic simulation using interactive hardware 99
